

Mimecast Mail Solutions

A product description by Adept

Product Overview

Many organizations have implemented collaboration tools for their business-critical messaging requirements. Over time, new threats and data governance issues emerge which require additional functionality to be added onto the original messaging platform.

In the case of email, the infrastructure often becomes too costly to manage and upgrade, even for the well-equipped ICT departments. To solve these problems, enforce a consistent email policy and reduce risk, ICT departments often supplement their email server with multiple point technologies. Disparate solutions are stitched together to provide archiving, continuity, encryption, threat detection and other vital services. The result is a fragmented, complex and expensive email environment that occupies server rooms with unnecessary infrastructure. All of these point solutions need to be configured to keep operating in the event that a business disaster occurs, ensuring that the organization doesn't expose itself to additional risk when it's in its most vulnerable state.

Mimecast services provide enterprise-level mail continuity, ensuring information is readily available and securely archived. They feature an always-on solution that reduces the complexities of managing your email environment.

Mimecast offers three distinctive services, which can be utilised individually or as a single amalgamated solution in the form of Unified Email Management (UEM) options. The three separate services are Secure Email Gateway, Cloud Archive and Security.

Key Features and Advantages

Service Name	Core Benefits
Secure Email Gateway	Simplifies your network - managed from a single console, no need for extra infrastructure
	Always-on, uninterrupted email
	Anywhere email access - browser access to live and archived email as well as calendars
	Seamless end user experience
Cloud Archive for Email	Resilient, bottomless, perpetual* email storage
	Reduced email administration overhead
	Easy search functions ensure availability of older email
Email Security	Stop spam and malware in the cloud
	Data Leak Prevention policy - immediate enforcement of email security measures
	Zero-hour threat analysis performed to identify emerging threats
Unified Email Management - Express	Combines Continuity, Archiving and Security services (58-day archiving duration)
Unified Email Management - Enterprise	Combines Continuity, Archiving and Security services (perpetual archiving - 99 year duration)

*As part of the UEM Enterprise solution

Additional Information

Mimecast services have a 7-step implementation process, which typically takes 2-3 weeks to initiate and complete. Also offered are ingestion services to bring all your existing email into the Mimecast solution.

Company Profile

Adept Internet was launched in January 1996 in Stellenbosch, and is today one of the oldest independent Internet Service Providers (ISPs) in South Africa. To be Adept is to be proficient and expertly accomplished. This is what we strive for and have achieved in all our services.

We cater for a vast variety of service needs. Our client base is broad and diverse, with customers based across the country. To them, we offer superlative services and products that we ourselves have complete confidence in, at all levels of information technology.

Many of our solutions are tailor-made, in order to perfectly suit each client's individual requirements. We thus ensure that our approach is personal and conforms to exactly what is needed in order to be successful.
