Product Overview

Adept's SSD Cloud virtual servers provide our clients with peace of mind about their IT infrastructure, giving the benefit of high-performance storage and redundant Fibre-based connectivity. By hosting a virtual server, capital expenses are reduced drastically, and one does not run the risk of single-server infrastructure failure.

The product consists of a virtual server package on SSD storage within the Teraco Data Centre. Each predefined package is delivered with a single public IP address. Clients have the option of the latest Windows or Linux-based server operating system deployment.

What is a Virtual Server?

It is merely a software implementation of a server. Virtual server hosting is done by means of taking large physical servers and then partitioning them into multiple virtual servers as required. Each of these can be set up as a separate server with its own software, as though it were a physical machine, with the functionality to manage them individually is available. Virtual servers can easily be removed or replaced, with the ability to deploy new servers within minutes.

A virtual server thus removes lengthy waiting periods and transforms capital expenditure into more manageable operational expenditure. The client still maintains full operational control over their server via their own private administrative credentials.

Features and Benefits

Feature	Benefit
Fibre-based redundant connectivity in the data centre	Immensely fast Internet breakout
No need to own or manage hardware infrastructure	Convert capital expenditure to operational expenditure
Client-owned server administrative credentials	You are in control of your own server and applications
Cloud server isolation	Data security
Regular infrastructure maintenance	Always hosted on a stable and reliable environment
Hosted environment monitoring	Identifying potential threats before they occur

Service Description and Pricing

SSD Cloud Packages

Package	RAM	vCPU	Disk	Traffic*	Monthly	Select (X)
512MB SSD Cloud	512 MB	1 core	20 GB	20 GB	R 72.50	
1GB SSD Cloud	1 GB	1 core	30 GB	50 GB	R 145.00	
2GB SSD Cloud	2 GB	2 cores	40 GB	100 GB	R 290.00	
4GB SSD Cloud	4 GB	2 cores	60 GB	150 GB	R 580.00	
6GB SSD Cloud	6 GB	2 cores	70 GB	175 GB	R 870.00	
8GB SSD Cloud	8 GB	4 cores	80 GB	200 GB	R 1,160.00	
12GB SSD Cloud	12 GB	4 cores	120 GB	225 GB	R 1,740.00	
16GB SSD Cloud	16 GB	8 cores	160 GB	250 GB	R 2,320.00	
32GB SSD Cloud	32 GB	12 cores	320 GB	300 GB	R 4,640.00	
48GB SSD Cloud	48 GB	16 cores	480 GB	500 GB	R 6,960.00	
64GB SSD Cloud	64 GB	20 cores	640 GB	750 GB	R 9,280.00	

*Once allocated data has been exceeded, an out-of-bundle rate of R 7.00 per GB applies

Operating System

Operating System	Monthly	Select (X)
Windows Server 2012 R2 Standard (Only available on 2GB+ packages due to system resource requirements)	R 175.00	
CentOS 7	N/A	
Ubuntu 14.04 LTS	N/A	
Ubuntu 16.04 LTS	N/A	

Notes

- The SSD Cloud virtual servers are limited to their packages and no custom specifications are available
- Adept also offers bespoke solutions with an SLA upon request; please contact us for further details
