

iPhone POP3 Mail Account Setup

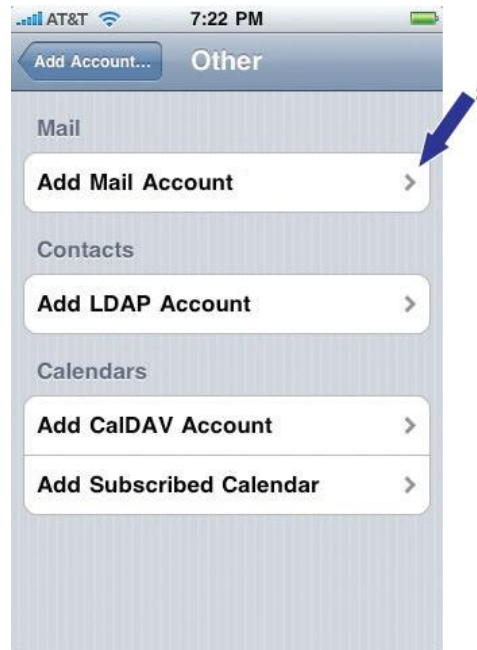

1. Tap on Settings, tap on Mail, Contacts and Calendars, and tap on Add Account

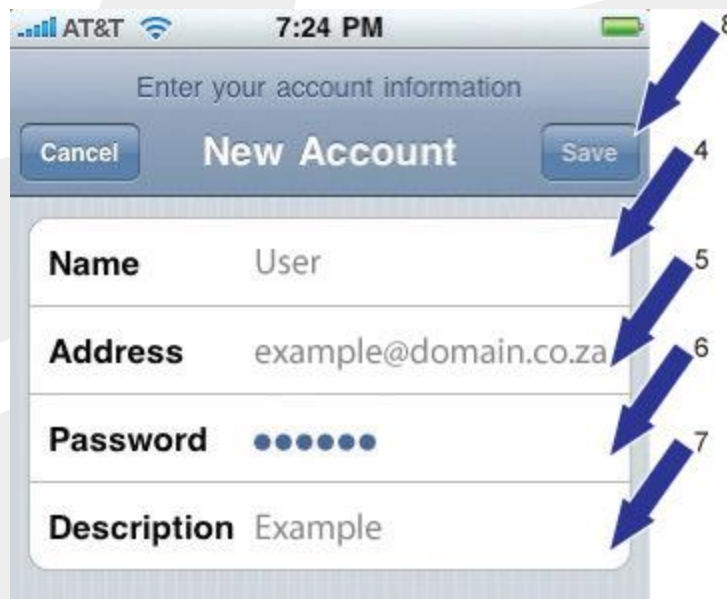

2. Select Other

3. Select Add Mail Account

4. Enter your name, email address and password as provided, and description; select Save

5. Enter the Incoming Host Name, User Name and Password as provided; enter the Outgoing Host Name, User Name and Password as provided, then select Save

The screenshot shows an iPhone screen with the status bar at the top displaying 'AT&T', signal strength, Wi-Fi, and the time '7:40 PM'. The main screen is titled 'Enter your account information' and 'New Account'. It features a 'Cancel' button on the left and a 'Save' button on the right. The form is divided into two sections: 'Incoming Mail Server' and 'Outgoing Mail Server'. The 'Incoming Mail Server' section includes fields for 'Host Name' (pop3.domain.co.za), 'User Name' (example@domain.co.za), and 'Password' (represented by six dots). The 'Outgoing Mail Server' section includes fields for 'Host Name', 'User Name', and 'Password', all with the placeholder text '[As provided by your ISP]'. Blue arrows with numbers 9 through 15 point to various elements: 9 points to the Incoming Mail Server header, 10 to the Incoming Host Name field, 11 to the Incoming User Name field, 12 to the Outgoing Mail Server header, 13 to the Outgoing Host Name field, 14 to the Outgoing User Name field, and 15 to the Save button.
